KCCT DISAGGREGATION FORM SPRING 2005 KENTUCKY PERFORMANCE REPORT ELEMENTARY

Page 1 – Cover page

Read and summarize the paragraph that is third from the bottom of the page on the left side.

| Page 2 – Introduction Which students are exempt from taking the KCCT? 1. 2. 3. |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Page 3 - Accountability Cycle What is the school's accountability goal for 2006? Did the school meet its accountability goal in 2005? Did the school meet novice reduction in 2005? What is the baseline for the school? What is the standard error for the school? What is the school's goal for the next biennium (2008)? |
| Page 4 – Accountability Trend Did any academic areas show steady growth over six years? If yes, which areas? |
| Did any academic areas decline or show inconsistent performance? If yes, which areas? |
| Did any of the non-academic data show movement in either a positive or negative direction? Explain. |
| Does the NRT data show change? Explain. |

Page 5 – Disaggregation Index Trends – Academic Index

Compare annual trend data for each subgroup. Which subgroups show increases in the academic index?

Are there any subgroups that show decline? If so, which ones?

Page 6 - Content Area Index Trends

Compare scores in each category. Write in the corresponding box + (gain) or - (loss) and the number of points. If the gain or loss is 3 or more points, circle the answers in red.

| Year | Academic | Reading | Math | Scienc | Soc.St. | Writing | А&Н | PL/VS |
|------------|----------|---------|------|--------|---------|---------|-----|-------|
| | Index | | | | | | | |
| From 1999 | | | | | | | | |
| to 2000 | | | | | | | | |
| From 2000 | | | | | | | | |
| to 2001 | | | | | | | | |
| From 2001 | | | | | | | | |
| to 2002 | | | | | | | | |
| From 2002- | | | | | | | | |
| 2003 | | | | | | | | |
| From 2003- | | | | | | | | |
| 2004 | | | | | | | | |
| From 2004- | | | | | | | | |
| 2005 | | | | | | | | |

Are there any content areas that declined over the five years, were flat, or showed uneven performance?

<u>Page 7</u> – Academic Index Comparisons
Write the index for each. If the school's index is greater than the district and/or state, circle the school's score in red.

| Academic Index | School | District | State |
|-------------------|--------|----------|-------|
| | | | |
| Reading | School | District | State |
| | | | |
| Math | School | District | State |
| | | | |
| Science | School | District | State |
| | | | |
| Social Studies | School | District | State |
| | | | |
| Writing | School | District | State |
| | | | |
| A & H | School | District | State |
| | | | |
| PL/VS | School | District | State |

(Reading 20% of KCCT) – Compare scores in each category. Write in the corresponding box + (gain) or - (loss) and the number of points If the gain or loss is 3 or more points, circle the answers in red. *Failure to reduce novices and/or total novices should be marked in red. Any losses in Proficient and Distinguished should be circled in red.

| Year | N-non | N-M | N-H | A-L | A-M | А-Н | P | D |
|-------------------|-------|-----|-----|-----|-----|-----|---|---|
| From 1999 to 2000 | | | | | | | | |
| From 2000 to 2001 | | | | | | | | |
| From 2001 to 2002 | | | | | | | | |
| From 2002-2003 | | | | | | | | |
| From 2003-2004 | | | | | | | | |
| From 2004-2005 | | | | | | | | |

Page 9- Reading Sub-domains

Compare school mean to state mean. Write a + or - and circle in red if the difference is less than the state mean by .3 or more points.

| Literary (50%) | Informational (25%) | Persuasive (10%) | Practical/Workplace |
|----------------|---------------------|------------------|---------------------|
| | | | (15%) |
| | | | |

*Compute the combined total % for B, 0, and 1. Is it greater or less than the % for 2 category? Place the total in the corresponding box. (Circle the answer in red if it is greater than the 2 category.) Place the % of 2s in the 2 column.

#Compute the combined total % for the 3 and 4. Place the total of 3 and 4 in the corresponding box (Circle the answer in red if is less than the total of the B,0,1, and 2 categories.)

^Check for comparison with state mean; if our mean is above the state place a (+) in the appropriate box, if our mean is lower, place a (-). (Circle any (-) in red.)

For multiple choice, record % for correct and incorrect. (If % of correct is less than 50, circle in red.)

* B+0+1 % of 2s # 3 +4 Reading (Open ^ School/state Response) totals totals mean Literary Informational Persuasive Practical/Workplace Reading (Multiple Correct Incorrect Choice) Literary Informational Persuasive Practical/Workplace

Page 11– Reading Questionnaire Data

Questionnaire data – write the % in corresponding box (No. 39 – if the % totaled for 1-2 hrs, 3-4 hrs, and more than 4 hrs. does not total 70 % or more, circle No. 39 in red) (All

other questions – if the % totaled for some, 2-3 times and 4-5 times does not total 80% or more, circle the question no. red.

| No. | No time | Less 1 hr. | 1-2 hrs | 3-4 hrs | 4 hrs or more | Invalid |

| 47 | | | | | | |
| 48 | | | | | | |

<u>Page 12</u> – Reading Disaggregation – Performance Level Percents

Is there a specific subgroup(s) showing lower performance?

Page 13 - Disaggregation Index Trends - Reading

Compare annual trend data for each subgroup. Which subgroups show increases in the reading index?

Are there any subgroups that show decline? If so, which ones?

Page 14 – Reading Mean Scale Score/Standard Deviation

Which subgroup(s) has a mean that is close to a proficient cut score line?

Pages – Reading Scale Score data Disaggregation

Find any significant differences (asterisk* denotes significant difference) found in the school's subgroups. Differences are computed by subtracting scale scores (such as Female = 550 and Male = 523, when subtracted the answer is 27*, which is a significant difference)

Are there any subgroups at the school level where no significant differences exist? *Exclude information that is blank because there are fewer than 10 students in that group.*

*Compute the combined total % for B, 0, and 1. Is it greater or less than the % for 2 category? Place the total in the corresponding box. (Circle the answer in red if it is greater than the 2 category.) Place the % of 2s in the 2 column.

#Compute the combined total % for the 3 and 4. Place the total of 3 and 4 in the corresponding box (Circle the answer in red if is less than the total of the B,0,1, and 2 categories.)

^Check for comparison with state mean; if our mean is above the state place a (+) in the appropriate box, if our mean is lower, place a (-). (Circle any (-) in red.)

For multiple choice, record % for correct and incorrect. (If % of correct is less than 50, circle in red.)
